Data Centers: Taming the Energy Beast

Summary

Data Centers: Taming the Energy Beast

Previous Web Conference

Date: Tuesday April 9, 2013
Duration: 1 hour
Moderator: Spencer Sator
Agenda:

This roundtable discussion will bring together utility leaders from Silicon Valley, IT consultants, and expert researchers to discuss the current state of data centers: What works and what doesn't, best practices, and actionable advice. We'll discuss cutting-edge technologies, underutilized approaches, and the most effective ways to enact comprehensive energy and demand-response savings.

Speakers:

Spencer Sator, Product Manager, *E Source Technology Assessment Service*
Bryan Jungers, Research Manager, E Source
Mary Horsey, Research Manager, E Source
Bob Huang, Senior Associate, The Cadmus Group
Mary Medeiros McEnroe, Public Benefits Program Manager, Silicon Valley Power
David Mollerstuen, Founder, Alcatraz Energy
Geoff Overland, Data Center Program Manager, CLEAResult
Josh Wallace, Key Account Manager, City of Palo Alto Utilities

You will learn:

- Information on the latest technologies
- New ideas for holistic approaches
- How utilities and data centers can effectively work together
- How others are dealing with data center issues across North America

Who should attend:

Anybody concerned with data center efficiency is welcome to attend this web conference.

For more information about attending this event, please contact **Customer Service** or call 1-800-ESOURCE.
