**Lower your farm's energy costs
by upgrading to high-efficiency fans.**

If you use a thermostat to control your farm's fans, you should take a serious look at upgrading to high-efficiency systems. Not only do the latest fan technologies move more air more efficiently, they do so while using significantly less energy. So much so, it's likely upgrading could pay for itself in the form of reduced energy usage. You can find out how much upgrading may save your farm business by visiting our Web site and using our free Ventilation System Savings Calculator.

This is just one of the many energy saving ideas we'd like to share with you. As your energy provider, we want your farm to thrive for years to come. For details about high-efficiency fans and other great energy saving ideas, visit our Web site at wisconsinpublicservice.com.

Ideas with energy for today's farmers.
