

# Project your energy costs.

Sign up for  
**PowerProjector.**<sup>™</sup>

## WHAT IS POWERPROJECTOR?

The use of fluctuating fuel surcharges and renewable and efficiency portfolios makes the task of tracking and projecting electricity rates increasingly difficult for multisite organizations. *PowerProjector* can take the guesswork out of the budgeting process by providing you with retail rate projections for the market as a whole, as well as for your individual territories, so you can effectively and efficiently plan and budget your operational expenditures.

## WHAT CAN POWERPROJECTOR DO FOR YOU?

- Better estimate the return on investment for capital projects
- Simplify the task of tracking and projecting electricity rates for multisite organizations
- Save time on your energy-budgeting process
- Get defensible energy cost projections based on rigorous research and clear guidance
- Negotiate from an informed position when procuring energy contracts
- Save money on your energy contracts

Energy managers, facility managers, and general managers all turn to E Source when they need to be able to defend where budgetary numbers are coming from. We provide a sanity check so you can verify what you're hearing from utilities and deregulated suppliers regarding energy rates.
