

For Immediate Release

Dr. Kevin Vranes, Climate Change Expert, Joins E Source

BOULDER, CO, December 16, 2010—E Source has hired Dr. Kevin Vranes as the new senior technical product manager for Greenhouse Gas Management. He will be responsible for directing the E Source greenhouse gas (GHG) consulting practice and developing new products and services for enterprise GHG management.

“We’re excited to have Kevin join E Source,” said Chris Wiederspahn, vice president of Enterprise Energy Management Services at E Source. “His climate expertise and energy legislation background are going to be a great resource for our energy management clients who are looking for help in addressing their challenges related to climate risk.”

Dr. Vranes was formerly a principal consultant with Point380, a Boulder-based strategic energy and climate consulting firm, where he provided technical analysis and strategic advice on carbon emissions, carbon risk and finance, energy use, and climate and energy policy for corporations and trade associations. He also served as a senior legislative assistant to Senator Ron Wyden (D-Oregon) in Washington, D.C., where he worked on significant environmental and energy legislation such as the Energy Policy Act and the Clean Water Act, handled constituent and lobbyist meetings, and staffed committee hearings and bill markups. Dr. Vranes received his PhD in ocean and climate physics from Columbia University.

About E Source

[E Source](#) provides in-depth, objective energy expertise; energy management tools; and relevant business intelligence to help Fortune 500 companies meet the challenges of reducing demand, improving facility efficiency, implementing energy procurement strategies, and reducing carbon risk. Companies like Coca-Cola, Hyatt, Marriott, Kohl’s, and Lockheed Martin all turn to E Source for help controlling energy’s impact on their bottom lines.
