23rd Annual E Source Forum

[Advancing Energy Efficiency and Utility Customer Relationships](#)

Advancing Energy Efficiency and Utility Customer Relationships

September 19-23, 2010

Westin Tabor Center, Denver, Colorado

Mark your calendars and make plans to join us for the 2010 E Source Forum. The Forum brings together more than 300 representatives from utilities and other energy service providers as well as government representatives and others involved in improving and redefining how energy is delivered, purchased, and used.

In addition to offering insights on advancing the use and adoption of energy-efficiency programs, we'll provide practical information aimed at helping utilities improve and enhance their customer relationships. You can expect to find sessions related to:

- Customer Service
- Demand-Side Management
- Intelligent Grid
- Marketing and Communications
- End-Use Technologies

Forum doesn't just keep you current on today's trends, best practices, and critical issues. It's also known for creating a unique atmosphere that fosters collaboration and peer networking in a friendly, collegial environment.

In addition to the informative sessions, we'll be hosting an exhibit that will showcase a selection of energy-related technologies and products. Breaks in the exhibit area will help facilitate new and renewed business relationships among attendees and exhibitors.

If you have questions about this meeting, please e-mail Janice Field, senior manager, E Source Customer Service & Events, or call her at 303-345-9112.
