

MARCH 1, 2012

## Energy Policy Update

**Time:** 12:00 p.m. MST

Join us for the first in our new series of web conferences on the state of U.S. energy policy. We'll provide a quick rundown and analysis of the latest comings and goings in federal and state energy policy. We've designed the series to help busy corporate energy managers stay abreast of the high-impact energy-policy machinations that don't make the daily news. We'll cover anything being discussed on Capitol Hill or at the state level that could affect:

- Energy prices
- Reliability
- Energy-efficiency research and development
- Utility fuel mix
- Renewables
- Carbon regulation

We'll give our expert opinion about the likelihood of regulations passing and their potential impacts. Whether you regularly track policy or are a casual observer, this web conference is for you.

### **Speakers:**

**Kevin Vranes, PhD**, director of Energy Management Services, manages the E Source services that are geared toward corporate energy managers, vendors, energy service companies, and third-party solutions providers. He was a Public Policy Fellow at Columbia University and a senior legislative staffer on the Washington, DC, staff of Senator Ron Wyden of Oregon. While on the Hill, Kevin worked closely on the bill that became the Energy Policy Act of 2005. He worked on oversight of the U.S. Department of Energy (DOE) and the U.S. Environmental Protection Agency (EPA) and was involved in many other aspects of environmental and energy policy.

**Bill Horton**, director of Analytics at E Source, manages and provides research and analytical services for the company. Areas of research include supply-side analytics for the electric industry; fuels; price forecasting for electricity and fuels; regulatory affairs at the local, state, and federal level; renewable portfolio standards and their impact on the generation mix; energy procurement strategies; and general electric, natural gas, coal, nuclear, hydro, and renewable market intelligence.

### **You will learn:**

- The latest from the EPA and the DOE
- Where Congress is headed in 2012
- What the White House is thinking this year
- An update on the California AB 32 implementation

### **Who should attend:**

Members of the *E Source Corporate Energy Managers' Consortium*, *Business Market*, *Business Account Management*, and *Business Customer Outreach Services* involved in energy management, energy procurement, finance, purchasing, or operations as well as other E Source members with an interest in energy policy.

For more information about attending this web conference, please contact Customer Service or call 1-800-376-8723 option 6.
