DSMdat is our database of thousands of demand-side management (DSM) programs in the US and Canada. It provides the most user-friendly and comprehensive reporting available today on energy-efficiency, load management, demand-response, and customer-sited renewable generation offerings from electric and gas utilities, government agencies, and nonprofit organizations.

With DSMdat, you'll get insights into:

- The programs other utilities in your state or province—or in the entire US or Canada—are running
- How your portfolio of programs compares to that of similar utilities
- How much of an incentive other program administrators offer
- The measures that other programs include
