

Key findings from the 2018 E Source Utility DER Strategy Benchmark

By Alanya Schofield

July 17, 2018

The E Source [Utility DER and Electrification Benchmark](#) is an annual survey of US and Canadian utilities' distributed energy resource (DER) strategy-related efforts. It's intended to help our utility members develop more-effective and comprehensive DER strategies and tactics. Check out our infographic for some high-level results from the 2018 study.
