

How mature is VOC in the utility sector?

Findings from the 2020 Customer Experience Survey

By Eryc Eyl, Heather Hilgenkamp, Laura Beausire

August 4, 2021

Key takeaways

- Utilities' voice-of-the-customer (VOC) maturity varies widely.
- Utilities are more focused on gathering VOC data than on analyzing it or acting on it.
- Utilities often include customer satisfaction (CSAT) data in their corporate goals.
- Improve VOC maturity by helping program, product, and service development teams incorporate VOC insights; following up with employees who receive positive feedback; and regularly sharing relevant VOC insights with all employees.

[More resources on VOC](#)

VOC management is the cornerstone of an effective customer experience (CX) program. It can help you develop a real understanding of your customers, build momentum for CX, cultivate trust with customers, engage employees, and more.

Our research from the E Source 2020 [Customer Experience Survey](#) reveals there isn't a singular approach to managing VOC data. Some utilities rigorously collect, analyze, act on, close the loop on, and share these insights. Others conduct surveys with no follow-up.

To understand VOC maturity among utilities, we evaluated the results of the Customer Experience Survey. We received responses from 20 utilities across the US and Canada, providing us with valuable insights on the maturity of VOC management.

How do we calculate VOC maturity?

Defining the disciplines and activities of VOC management

We asked utilities about 46 VOC management activities. We've categorized them into five disciplines that contribute to an effective VOC program:

- *Listen*. Gather VOC data from solicited sources (surveys, focus groups, ethnographic research) to unsolicited (complaints, social media, call recordings), and from structured channels (closed-ended survey questions) to unstructured channels (chat transcripts).
- *Analyze*. Turn VOC data into insights that you can apply to manage CX.
- *Act*. Use VOC insights to manage CX or to embed a customer-centric focus in the organization.
- *Close the loop*. Respond to the customer and resolve any immediate issues they raise.
- *Share*. Make sure the organization is aware of, and engaged with, VOC information.

Turning survey data into a VOC maturity assessment

To transform utilities' survey responses into an assessment of VOC maturity, we evaluated the data based on some guiding assumptions. First, we looked at the 46 VOC management activities and identified the most effective strategies (we go into more detail on these activities in the section [Looking at VOC maturity by activity](#)). Those include:

- Sharing VOC results with all employees on a weekly, monthly, or quarterly (rather than annual) basis
- Including a customer's emotional response in transactional surveys
- Measuring and analyzing CSAT

For each of these positive strategies, we awarded 1 point to the utility, the activity, or the discipline. Then, we added together those points to rank the 20 responding utilities in VOC maturity. We also looked at how each activity ranked in popularity, and we ranked each of the five disciplines based on the percentage of points it received. If a strategy we considered effective was also included in corporate-level performance goals, we also gave points to those goals at the department, team, and individual levels.

How mature are utilities' VOC programs?

Looking at VOC maturity by utility

We saw a wide distribution of points among the 20 utility respondents (**figure 1**). Of a possible 46 points—each utility could earn 1 point per activity, with a total of 46 activities—the top utility in VOC maturity earned 34 points and the bottom utility earned only 3 points.

Figure 1: Ranking utilities according to VOC maturity

The most mature utility conducted over three-quarters of the activities we associate with VOC maturity—10 times more than the least-mature utility.

Base: n = 20 utilities for S3_1, S3_2, S3_4, and S5_1; n = 17 utilities for S3_3; n = 19 utilities for S5_3. **Question S3_1:** How does your organization solicit feedback from its customers on their perceptions of and satisfaction with the company? Select all that apply. **S3_2:** What other listening posts do you monitor for unsolicited customer feedback? Select all that apply. **S3_3:** What does your organization measure with its transactional surveys? Select all that apply. **S3_4:** How often does your organization close the feedback loop after gathering customer feedback? **S5_1:** Which of the following metrics does your organization measure and analyze? **S5_3:** At what levels within your organization are each of the following metrics incorporated into performance goals? Select all that apply. **Note:** Each utility could score a total of 46 points, as each activity was worth 1 point. © E Source (2020 Customer Experience Survey)

Looking at VOC maturity by discipline

Utilities are spending more effort and resources on gathering VOC data than on analyzing it or acting on it (**figure 2**). Utilities have an opportunity to improve VOC management by analyzing the data they've gathered and using it to influence their CX management.

Figure 2: Listening is widespread, while other VOC disciplines are relatively uncommon

Most utilities are listening to customers, but far fewer are analyzing, acting on, closing the loop on, or sharing VOC data.

Base: n = 20 utilities for S3_1, S3_2, S3_4, and S5_1; n = 17 utilities for S3_3; n = 19 utilities for S5_3. **Question S3_1:** How does your organization solicit feedback from its customers on their perceptions of and satisfaction with the company? Select all that apply. **S3_2:** What other listening posts do you monitor for unsolicited customer feedback? Select all that apply. **S3_3:** What does your organization measure with its transactional surveys? Select all that apply. **S3_4:** How often does your organization close the feedback loop after gathering customer feedback? **S5_1:** Which of the following metrics does your organization measure and analyze? **S5_3:** At what levels within your organization are each of the following metrics incorporated into performance goals? Select all that apply. © E Source (2020 Customer Experience Survey)

Looking at VOC maturity by activity

Analyzing VOC maturity by the 46 activities included in our survey allows us to understand how common various VOC management practices are among utilities. Nine of the 10 most common activities come from the listen discipline (**figure 3**). However, 1 of the top 10 activities—including CSAT in performance goals at least at the corporate level—comes from the act discipline.

Figure 3: Most utilities monitor complaints, social media, and calls and conduct surveys

Including CSAT in corporate goals has become as common as measuring CSAT by conducting focus groups or online customer panels.

Discipline	Activity	Utilities that selected each activity
Listen	Monitor complaints	19
	Conduct relationship surveys	18
	Conduct transactional surveys	17
	Monitor social media	17
	Monitor and record calls	17
	Measure satisfaction with transaction via transactional surveys	16
	Monitor focus groups	15
	Monitor online customer panels	15
	Measure ease of completing transaction via transactional surveys	15
	Measure satisfaction with utility employee via transactional surveys	13
	Monitor email or chat transcripts	11
	Measure transactional completion via transactional surveys	11
	Gather qualitative ethnographic research	7
	Measure emotional response to transaction via transactional surveys	5

Base: n = 20 utilities for S3_1, S3_2, S3_4, and S5_1; n = 17 utilities for S3_3; n = 19 utilities for S5_3.

Question S3_1: How does your organization solicit feedback from its customers on their perceptions of and satisfaction with the company? Select all that apply. **S3_2:** What other listening posts do you monitor for unsolicited customer feedback? Select all that apply. **S3_3:** What does your organization measure with its transactional surveys? Select all that apply. **S3_4:** How often does your organization close the feedback loop after gathering customer feedback? **S5_1:** Which of the following metrics does your organization measure and analyze? **S5_3:** At what levels within your organization are each of the following metrics incorporated into performance goals? Select all that apply. © E Source (2020 [Customer Experience Survey](#))

Discipline	Activity	Utilities that selected each activity
Analyze	Measure and extensively analyze customer satisfaction (CSAT)	12
	Measure and extensively analyze employee satisfaction	9
	Measure and extensively analyze first-call resolution	7
	Measure and extensively analyze self-service containment	6
	Measure and extensively analyze first-contact resolution	5
	Measure and extensively analyze Net Promoter Score (NPS)	4
	Measure and extensively analyze Customer Effort Score (CES)	4
	Measure and extensively analyze journey-based metrics	3
	Measure and extensively analyze vendor metrics	1
	Measure and extensively analyze in-house metrics	0

Base: n = 20 utilities for S3_1, S3_2, S3_4, and S5_1; n = 17 utilities for S3_3; n = 19 utilities for S5_3.

Question S3_1: How does your organization solicit feedback from its customers on their perceptions of and satisfaction with the company? Select all that apply. **S3_2:** What other listening posts do you monitor for unsolicited customer feedback? Select all that apply. **S3_3:** What does your organization measure with its transactional surveys? Select all that apply. **S3_4:** How often does your organization close the feedback loop after gathering customer feedback? **S5_1:** Which of the following metrics does your organization measure and analyze? **S5_3:** At what levels within your organization are each of the following metrics incorporated into performance goals? Select all that apply. © E Source (2020 [Customer Experience Survey](#))

Discipline	Activity	Utilities that selected each activity
Act	Incorporate CSAT into performance goals at least at the corporate level	15
	Incorporate self-service containment into performance goals at least at the department level	7
	Incorporate employee satisfaction into performance goals at least at the corporate level	6
	Integrate feedback into strategy at least annually	5
	Incorporate NPS in performance goals at least at corporate level	3
	Integrate customer feedback into product development at least annually	2
	Integrate customer feedback into customer experience initiatives at least annually	2
	Incorporate first-call or first-contact resolution into performance goals at least at the corporate level	2
	Incorporate journey-based metrics into performance goals at least at the department level	2
	Integrate customer feedback into internal processes at least quarterly	1
	Integrate customer feedback into touchpoint improvements at least quarterly	1
	Incorporate CES into performance goals at least at the corporate level	1
	Incorporate in-house metrics into performance goals at least at the corporate level	0

Base: n = 20 utilities for S3_1, S3_2, S3_4, and S5_1; n = 17 utilities for S3_3; n = 19 utilities for S5_3.

Question S3_1: How does your organization solicit feedback from its customers on their perceptions of and satisfaction with the company? Select all that apply. **S3_2:** What other listening posts do you monitor for unsolicited customer feedback? How do you improve VOC at your utility?

Utilities have an opportunity to become more mature in their management of VOC data. While many have adopted survey tactics to gather the voice of the customer, far fewer utilities are using the information they've collected to produce insights and improve CX.

To gain VOC maturity:

- Listen: Incorporate unstructured feedback such as call recordings and survey comments into your VOC

program for added depth and insights.

- Analyze: Conduct extensive driver analyses of your utility's top CX metric to find areas you can improve.
- Act: Help program, product, and service development teams incorporate VOC insights.
- Close the loop: Follow up with employees who receive positive feedback.
- Share: Regularly share relevant VOC insights with all employees.
