

# **Celebrating the 50th anniversary of Earth Day during the COVID-19 pandemic**

## **Don't keep your Earth Day 2020 communications in quarantine**

By Anna Nixon

April 21, 2020

---

April 22, 2020, marks the 50th anniversary of Earth Day, but many utilities have gone silent on the topic due to the COVID-19 pandemic. But you don't have to choose between the fight against the virus and the climate crisis, and utilities have the platform to create change for both. Now is the time to make or increase environmental commitments, promote the value of energy efficiency, and offer energy upgrades to businesses while their doors are closed.

Despite widespread social-distancing and shelter-in-place orders, Earth Day 2020 will go on virtually. Utilities and nonutilities alike have found the following creative ways to bring their Earth Day celebrations into customers' homes:

- Providing online educational activities
- Participating in or hosting virtual Earth Day events
- Communicating about environmental initiatives
- Sharing energy-efficiency or sustainability tips

We encourage you to join in, and hope the following examples will inspire your utility's virtual Earth Day 2020

celebration.

## **Earth Day educational activities**

Schools may have closed, but learning hasn't stopped. Parents have assumed the role of teachers and could use your help keeping their little ones engaged. Take this as an opportunity to revisit your educational materials and make them online-friendly (**figure 1**).

### **Figure 1: Earth Day 2020 virtual educational activities**

Organizations are helping families get into the Earth Day spirit by highlighting educational resources and activities.

### **MGE created an Earth Day 2020 themed educational booklet full of sustainability lessons and at-home activities.**

## Overview

Although this year's Earth Day Fest has been cancelled due to the COVID-19 pandemic, we're still excited to celebrate Earth Day!

Join us for the Virtual Earth Day Challenge for four whole weeks of environmental education, entertainment and hands-on activities. This challenge is a series of four weekly newsletters sent to your inbox. If you're interested in participating, sign up for the newsletters [here](#):

## #EarthDayAtHome with NASA

On April 22, 1970, the world marked the first Earth Day. As we physically separate ourselves by necessity, we can still collectively appreciate the wondrous beauty of our planet

To help get you started, NASA has collected numerous activities to help you observe "Earth Day at Home."

**The US Environmental Protection Agency shared environmental information and online educational resources to help families celebrate Earth Day 2020 virtually.**

# Celebrate the 50<sup>th</sup> Anniversary of Earth Day with EPA

This year, April 22nd marks the 50<sup>th</sup> anniversary of Earth Day, a day celebrated by millions of people across the world. Since the first Earth Day in 1970, the United States has made tremendous progress improving air quality, cleaning up contaminated lands, and protecting our water resources. As part of that progress, EPA is working hard to ensure all Americans have a clean, healthy environment and a more prosperous future.

EPA remains committed to protecting human health and the environment as we continue to adjust to the evolving COVID-19 pandemic. While many of us are staying safe at home this Earth Day, we wanted to share some of our environmental information and educational resources for remote learning. Please feel free to share these resources with others. Have a happy and safe Earth Day!

## Environmental Education Resources

### [All About EPA: How Does EPA Protect the Environment Activity Book](#)

Learn the basics about how EPA protects our health and environment.

*All ages*

*Type of Resource: Book*

### [History of EPA Research](#)

From the start, EPA researchers and partners have provided the data, knowledge, and tools needed to tackle the most pressing environmental and related health challenges the nation has faced. On our History of EPA Research webpage, you'll find links to milestones and other resources grouped by research area.

*All ages*

*Type of Resource: Webpage*

### [Recycle City](#)

Explore Recycle City to learn how its residents reduce waste, use less energy, and even save money by doing simple things at home, at work, and in their neighborhoods.

*All ages*

*Type of resource: Website/app*

### [Endangered Species: Save Our Species Coloring Book](#)

Did you know that EPA works to ensure that pesticides can be used safely without impacting our country's endangered plants and animals? Our endangered species coloring book introduces you to the different types of species EPA's pesticides program works to protect.

*All ages*

*Type of resource: Coloring book*

## Earth Day virtual events

Just because you can't gather in person doesn't mean you should cancel your Earth Day 2020 events. The following utilities and nonutilities worked quickly to bring their Earth Day 2020 events online, no pants required (**figure 2**).

### Figure 2: Online events to celebrate Earth Day 2020

In-person events are going virtual as utilities and other organizations look to engage with people online.

**City of Palo Alto turned its previously scheduled 2020 Sustainability and Climate Action Plan Community Engagement Workshop into an eight-part on-demand webinar.**

With Earth Day coming up on April 22, there are several ways to bring awareness to issues like climate change and our local sustainability efforts. This blog provides a summary of ways to participate in Earth Day awareness from the safety of your home.

### Earth Day environmental initiatives

Earth Day 2020 is a great excuse to talk about (or rethink) your environmental commitments. Approach this topic with empathy and make your customers the hero of your sustainability story (**figure 3**).

### Figure 3: Pacific Power's Earth Day 2020 environmental initiatives

Pacific Power acknowledged that Earth Day will look a little different this year, but that it still wanted to celebrate by sharing its sustainability efforts. The utility directed customers to its website, where it shared 12 specific ways it's taking care of the earth.

## Energy-efficiency and sustainability tips

With people spending more time at home, there's never been a better time to share energy-efficiency and sustainability tips. Your customers are likely bracing for higher bills. Help them feel more in control by sharing simple ways to save energy and money (**figure 4**).

### Figure 4: Earth Day 2020 energy-efficiency and sustainability tips

Earth Day is all about taking action, but options are limited with stay-at-home orders. Organizations suggest ways for people to help the planet from the comfort of their home.

**PNM has been sharing sustainability-related tips and stories each day for the 50 days leading up to Earth Day. The utility got a gold star for making these tips helpful, timely, and funny during this uncertain time.**

The 50th anniversary of Earth Day is April 22. To celebrate, starting tomorrow for 50 days we'll share a simple, earth-loving, sustainability tip or story with you. Happy Earth Day 50! [#PNMEarthDay50](#) [#EarthDayEveryDay](#) [#EarthDay50for50](#)
