

Let machine learning transform the way you manage gas-distribution resources

September 17, 2021

Data science company E Source has helped dozens of utilities transform the way they manage gas-distribution resources. The <u>E Source GridInform</u> (PDF) gas module leverages data science and artificial intelligence (AI) to predict gas leak repairs before they're needed—allowing your team to optimize staffing and resource planning.

Learn more about our <u>grid and asset optimization</u> solutions and how our <u>data science</u> team can help you manage gas-distribution resources.
